

I would like to tell you that K-Love is very important to myself, my family and friends. K-Love brings us very relivant news and public event announcements. It is also the station that we count on for public safety announcements, as its signal is received clearly and timely.

K-Love keeps family and friends connected to each other as well. We have several friends in the military serving in Iraq and other places and they are able to listen to K-Love via the internet as we listen on the regular station signals. What a great connection!!!

I can not imagine not having K-Love at the signal that it is currently at! We are in a very rural and mountainess area and lower powered signals do not broadcast well. Therefore I feel very threatened that it would be possible for you to "trade" the signal that K-Love broadcasts at with someone else!

K-Love shows no political bias in their comments and they very possitively bring stories and music that encourage those listening! With so many commercially supported stations out there with no time for anything except a little music and a lot of advertisements, K-Love is a blessing because with a lot of music and time for success stories, real-life experiences, positive news, announcements for community events... it's the "smile" that soooooo many people need in their day! Thank you for your time with my comments.
